

THE AI LAYER · ON YOUR SAP DATA

OnePilot

The governed AI layer that operates your SAP treasury apps, in production today.

THE PROBLEM

Automation across treasury usually means bespoke code, and the more you build the more there is to maintain and audit.

SAP **SAP and non-SAP** bi-directional, across your landscape

WHAT IT DELIVERS

- ◆ The autonomous layer across the applications: it asks, automates and acts on your treasury operations, inside your controls.
- ◆ Validation, anomaly detection, segregation of duties and four-eye approval, with a full audit trail.
- ◆ Codeless framework: build your own apps and automation without a line of code.
- ◆ Manage by exception; your team stays in command.
