

TRADE CAPTURE · INTO SAP TRM

Brisken Smart Trading

The trade lifecycle end to end, from the venue into SAP, no re-key.

Formerly Trade Automation / TraderPlus, now Brisken Smart Trading (BST).

THE PROBLEM

Treasury desks still re-key trades from the execution venue into SAP TRM by hand. It is slow, it is a control risk, and it breaks the moment a venue changes a field.

HOW IT WORKS

decision · approval · execution

EXECUTION VENUES

FXall

Bloomberg FX GO

360T

BidFX

SAP **SAP TRM & FAM** deal created straight through

WHAT IT DELIVERS

- ◆ Capture the trade at the execution venue and create the deal in SAP straight through, validated.
- ◆ Trading-venue and TMS agnostic, so a new venue is configuration, not a rebuild.
- ◆ Four-eye approval, segregation of duties and a full audit trail, with no ABAP and no per-venue interface to maintain.

◆
no re-key

◆
venue + TMS agnostic

◆
governed by design

◆
configured, not coded
