

Instantly Audit Inventory

Meji Media, Banter Experiences, MejiAI For Gurmej Pawar 2026-05-10

1. Project context

Item	Detail
Audit origin	Requested by Gurmej on 2026-04-22 call; tracked in the handover package
Three growth segments raised on 2026-04-22	(1) Instantly outbound revival across Christmas DB warm, cold revival, and hen/stag DB; (2) lead-scoring and monitoring dashboard for Instantly; (3) corporate-side automation
Two Upwork threads	Thread 1 "Automated Follow-Up System Development" (Gurmej, Jess, Anuj). Thread 2 "General outreach project" (1:1 with Gurmej). Instantly work belongs in Thread 2
Instantly login	<code>gurmej@mejimedia.com</code>
"10 to 11 warmed domains" framing	Stated on 2026-04-27 in Thread 2
Banter Experiences ownership	Established in-session: a Gurmej-owned business, not separate
Three outbound businesses operating	Meji Media (events), MejiAI (automation services for trades), Banter Experiences (stag/hen/corporate weekends)
Stakeholders on the Upwork side	Gurmej (owner, decision-maker), Jess Harrar (operations), Anuj (developer and DNS)

2. Campaign metrics from the dashboard

The top-level Campaigns view.

Campaign	Status	Sent	Click	Replies	Reply rate	Opportunities
Event Mgmt Companies / Chatbots / Vayne	Paused	1,924	0	37	3.5%	2
MejiAI / Construction, HVAC, Plumbers, Electricians	Bounces (auto-paused)	216	0	7	3.9%	0
Meji Media / Corporate Events / Big Companies in UK	Bounces (auto-paused)	1,968	0	21	2.0%	0
Meji Media – Christmas Bookers	Active 99%	1,923	0	42	4.3%	4
Banter reactivation – Booked	Completed	8,588	0	48	1.1%	8
Totals		14,619	0	155		14

Workspace-level:

Item	Value
Lead-credit balance ("Get Leads" pool)	1,000
Click tracking	Disabled across every campaign (all show 0 clicks)

3. Per-campaign analytics drill-down

Detailed data analytics by campaign.

3a. MejiAI

Field	Value
Last send activity	Single send-spike mid-November 2025 (around 13 to 18 Nov), flatline since
Progress	18%
Sequence started	Blank on Analytics header
Open rate	Disabled
Click rate	Disabled
Opportunities	0
Conversions	0
Step 1 total	180 sent, 0 opened, 7 replied (3.89%), 0 clicked, 0 opportunities
Step 1 variant A	60 sent, 2 replies (3.3%)
Step 1 variant B	60 sent, 4 replies (6.7%)
Step 1 variant C	60 sent, 1 reply (1.7%)
Step 2 (single variant A)	36 sent, 0 opens, 0 replies

3b. Corporate Events

Field	Value
Last send activity	Spikes 9 Nov to 15 Dec 2025, then two further spikes mid-January 2026, flatline since
Progress	69%
Sequence started	1,058 unique leads
Open rate	Disabled
Click rate	Disabled
Opportunities	0
Conversions	0
Analytics date filter	"Last 6 months"
Step 1 total	1,058 sent, 0 opened, 11 replied (1.04%), 0 clicked, 0 opportunities
Step 1 variant A	353 sent, 5 replies (1.4%)
Step 1 variant B	353 sent, 4 replies (1.1%)
Step 1 variant C	352 sent, 2 replies (0.6%)
Step 2 (single variant A)	910 sent, 0 opens, 9 replies (0.99%), 0 opportunities

3c. Christmas Bookers

Field	Value
Status	Active 99%
Step structure	Step 1 only, no automated Step 2
Step 1 subject variants configured	4 (A active, B/C/D inactive)
Step 1 "Send next message in" setting	2 days (unused, since no Step 2 exists)
Sender mailboxes attached	<code>gurmej.pawar@mejimedia.co</code> , <code>gurmej@mejimedia.co</code> (visible in reply From: fields)

4. Diagnose API output

Both bounce-paused campaigns returned identical JSON.

Campaign	Status returned	Diagnostics object
MejiAI	<code>campaign_bounce_protect</code> (paused due to bounce protection)	<code>null</code>
Corporate Events	Same status, same message	<code>null</code>

Other fields on both exports: `issue_started_at: null` , `last_healthy_send_at: null` , `ai_summary: null` . No per-domain breakdown returned.

5. Sender infrastructure

The Email Accounts page, split into per-mailbox and per-domain views.

5a. Per-mailbox

Mailbox	Sent today	Warmup volume	Health %	Indicator
gurmej.p@mejiai.com	0 of 30	62	100	Green flame
gurmej.p@mejievent.com	0 of 30	64	98	Green flame
gurmej.p@mejimedia.co	0 of 30	0	100	Red flame
gurmej.pawar@mejiai.com	0 of 30	61	100	Green flame
gurmej.pawar@mejievent.com	0 of 30	63	100	Green flame
gurmej.pawar@mejimedia.co	0 of 30	0	0	Red flame
gurmej@mejiai.com	0 of 30	62	100	Green flame
gurmej@mejievent.com	0 of 30	61	100	Green flame
gurmej@mejimedia.co	0 of 30	0	100	Red flame
jessica.h@banterexp.com	0 of 30	65	100	Green flame
jessica.harrar@banterexp.com	0 of 30	69	100	Green flame
jessica@banterexp.com	0 of 30	70	100	Green flame

Item	Value
Mailbox rows visible across both screenshots	12
User-stated authoritative total	11
Discrepancy	One mailbox in the source data isn't in the stated count. Most likely the 0%-health gurmej.pawar@mejimedia.co excluded as effectively dead

5b. Per-domain

Domain	Mailbox aliases	Persona	Warmup state	Visible use
mejimedia.co	gurmej, gurmej.p, gurmej.pawar	Gurmej Pawar (parent brand)	Off across all three (mature production)	Christmas Bookers, Corporate Events
mejiai.com	gurmej, gurmej.p, gurmej.pawar	Gurmej Pawar (sub-brand)	On	MejiAI
mejievent.com	gurmej, gurmej.p, gurmej.pawar	Gurmej Pawar (sub-brand)	On	Mixed; appears in Corporate Events reply chains
banterexp.com	jessica, jessica.h, jessica.harrar	Jessica Harrar	On	Banter reactivation

6. Bounce composition

Recipient-level detail for the two bounce-paused campaigns.

6a. MejiAI bounced leads (12 visible)

All show "Email Security Gateway: None".

Recipient	Title	Provider
peter@ecologic-sips.co.uk	Founder	Microsoft
michaelg@rcd-yorkshire.co.uk	Contract Manager	Other
jeremy@smeconcepts.co.uk	Chief Executive Officer	Google
jamie@taylorsolar.co.uk	Director & Co-Founder	Microsoft
dave_simms@narboroughwindowsconservatories.co.uk	Business Owner	Microsoft
debbi@torrancegroup.co.uk	Company Owner	Microsoft
andrew.coombe@quantumquote.co.uk	Founder / Director	Not Found
dave.w@midlandsflooring.co.uk	Managing Director	Microsoft
wspence.mice@pmgroup-global.com	Construction Manager	Microsoft
matthew_booth@nwflooringsolutions.co.uk	Co-Owner	Microsoft
andy_wynjones@xpressiveinteriors.co.uk	Director Owner	Other
doherty@foundationsolutionshv.com	Supervisor	Microsoft

Stat	Value
MejiAI bounce count (visible)	12
MejiAI Step 1 sent	180
MejiAI bounce rate	6.7% (12 / 180)

6b. Corporate Events bounced leads (12 of 19 visible)

Recipient	Title	Provider	Gateway
e.j.robinson.1@bham.ac.uk	Operations Coordinator / PA	Other	Proofpoint
d.coleman@bham.ac.uk	CEO, University of Birmingham	Other	Proofpoint
l.h.neale@bham.ac.uk	PA / Administrative Officer	Other	Proofpoint
james@taxbuddi.co.uk	Chief Executive Officer	Google	None
ababirye@misr.mak.ac.ug	PA (listed as Univ of Nottingham; actually Makerere, Uganda)	Other	None
s.vincent@bham.ac.uk	PA to Director of Development	Other	Proofpoint
blackburn@nfumutual.co.uk	PA	Microsoft	None
lian.styring@mfgsolicitors.com	PA, mfg Solicitors LLP	Other	Mimecast
a.partleton@bham.ac.uk	PA	Other	Proofpoint
liz.rowe@communitytransport.org	Deputy Chief Executive Officer	Other	None
a.m.farley@bham.ac.uk	Office Manager / PA	Other	Proofpoint
liz.stokes@apc-overnight.com	Human Resources Director	Microsoft	None

Stat	Value
Corporate Events bounce counter	19 total
Corporate Events contacted (denominator)	622
Corporate Events bounce rate	3.1% (19 / 622)
bham.ac.uk concentration	6 of 12 visible bounces (50%)

7. Operational patterns

Patterns visible across the campaigns reviewed.

Pattern	Evidence
Single-touch send plus manual personal follow-up	Christmas Bookers Sequences view has Step 1 only (confirmed by Gurmej); inbox threads show Gurmej manually following up
2-day cadence between Step 1 and follow-up	Chris Rice Banter thread: 7 January Step 1, 9 January follow-up. Christmas Bookers Sequences config carries the same "Send next message in 2 Days" setting
Thread continuity within rotation	Chris Rice received Step 1 and the manual follow-up from the same <code>jessica.h@</code> alias, not a different jessica address
Three mailboxes per domain	Every domain has exactly 3 mailbox aliases (gurmej, gurmej.p, gurmej.pawar on Meji-side; jessica, jessica.h, jessica.harrar on Banter)
Persona separation by brand	Meji-side domains all use the Gurmej persona; <code>banterexp.com</code> uses the Jessica Harrar persona
Tracking globally disabled	Every campaign shows "Open rate: Disabled" and "Click rate: Disabled" on Analytics; dashboard shows 0 clicks across the board

8. Derived findings

Conclusions reached over the data in the previous sections, grouped by topic.

8a. Performance ratios

Finding	Evidence
MejiAI carries a 6.7% bounce rate	12 bounces from 180 Step 1 sends
Corporate Events carries a 3.1% bounce rate	19 bounces against 622 contacted
Christmas Bookers turns 9.5% of replies into tagged opportunities	4 opportunities from 42 replies
Banter turns 16.7% of replies into tagged opportunities	8 opportunities from 48 replies

8b. Capacity and infrastructure

Finding	Evidence
Daily send capacity sits around 250 emails	11 mailboxes at 30 a day nominal, minus mejimedia.co's warmup-off effect and general warmup overhead
That works out to roughly 7,500 emails a month	250 a day across 30 days
<code>mejimedia.co</code> is the production sender for Christmas Bookers and isn't broken	The same addresses appear in the From: line on Christmas Bookers reply threads. The red flame means warmup is off because the mailbox is mature, not because it's broken
The <code>.com</code> is the login mailbox; the <code>.co</code> is what actually sends	Login per the handover is <code>.com</code> ; senders in the inbox are all <code>.co</code> . Whether <code>.com</code> is ever used as a sender elsewhere isn't established
Sender reputation looks intact on what's visible in the workspace	Instantly health scores 98 to 100% on the working mailboxes; no spam-complaint trips; bounce trips trace to recipient-side issues, not sender-side
The Diagnose API doesn't show per-domain bounce breakdowns	Both JSON exports returned <code>diagnostics: null</code> plus the top-level paused-for-bounces status

8c. Failure modes

Finding	Evidence
MejiAI failed on list quality, not infrastructure	All 12 visible bounces show "Gateway: None"; the bounced leads span solar, panels, and generic consulting against a brief targeted at plumbing and HVAC; one human reply confirmed the recipient was on a wrong-vertical list
Corporate Events failed on audience choice, not deliverability	6 of 12 visible bounces are <code>bham.ac.uk</code> behind Proofpoint; the reply set includes an NHS Finance Administrator; a legal firm on the list ran Mimecast

9. Audit gaps

Items that couldn't be verified from the data available in this session, plus discrepancies surfaced during cross-checking.

Gap	Reason
Google Postmaster Tools data per domain	No DNS access on Meji-owned domains during the audit
Microsoft SNDS	Recipient-side opt-in tool, not generally claimable for arbitrary domains
Per-domain bounce attribution from Instantly	Diagnose API returned no breakdown for either bounce-paused campaign
Vayne campaign drill-down	Not opened beyond dashboard-level metrics (1,924 sent, 2 opportunities, paused)
Per-mailbox campaign attribution in Email Accounts view	Health is visible, but no per-campaign send mapping
Lead-source pipeline for any campaign	Not visible from Instantly; would need the previous contractor's lead-sourcing tool. Apollo, Lusha, or scrape source unknown
Whether NHS / public-sector recipients were intentional or scrape noise on the cold lists	The bounce and reply composition implies a list-quality issue. No explicit confirmation in-session
