

TRADE CAPTURE

Brisken Smart Trading

The trade lifecycle from venue to booked deal, straight through. No re-keying.

Formerly Trade Automation / TraderPlus, now Brisken Smart Trading (BST).

HOW IT WORKS

WHY IT MATTERS

Treasury desks still re-key trades from the venue into SAP TRM by hand: slow, a control risk, and it breaks the moment a venue changes a field.

WHAT IT DELIVERS

- ◆ The deal is captured at the venue and created in SAP TRM straight through, validated on the way in.
 - ◆ Venue and TMS agnostic, so a new venue is a configuration change, not a rebuild.
 - ◆ Four-eye approval and segregation of duties are built in, with no ABAP and no per-venue interface.
- ◆ no re-key | ◆ venue + TMS agnostic | ◆ four-eye + SoD | ◆ straight-through
