

REMITTANCE PROCESSING

Remittance Advice Gate

AI reads the remittance and posts it. No one retypes anything.

HOW IT WORKS

COMES IN AS

Unstructured emails
and attachments

AI reads · structures · matches

ENDS UP IN

Posted in **SAP S/4HANA**
matched, exceptions surfaced

WHAT IT DELIVERS

- ◆ An LLM reads the unstructured email or attachment, structures it, and posts to S/4HANA.
- ◆ Matches happen on the way in, so clean items flow through and only exceptions surface.
- ◆ Already in production: one S/4HANA customer removed the manual step entirely.

◆ LLM-read | ◆ auto-matched | ◆ exception-only | ◆ live today
