

AUTONOMOUS TRADING

Brisken Smart Trading

Autonomous trading, from the venue to booked in SAP.

Formerly Trade Automation / TraderPlus. Now Brisken Smart Trading (BST).

- ◆ Autonomous trading means the trade carries itself from the decision to the booked deal, with no manual re-keying.
- ◆ Provable by design: rule-based execution at the best bid, competitive bids recorded, every step on a 360° audit trail.
- ◆ Any instrument, any venue, any system: FX spot and forward, swaps, NDFs, derivatives, money market and securities.
- ◆ The trading space: your team and its Digital Co-Workers run it together; people stay in charge.

THE CENTRAL STATUS MONITOR

01

Request

Exposure in SAP becomes a request, with the controls and four-eyes applied up front.

02

Execute

At the best bid, competitive bids recorded: 360T, FXall, Bloomberg FXGO, banks and brokers.

03

Match & book

Confirmations matched, the deal booked in SAP TRM straight through, no re-keying.

04

Monitor

Every step in one place, with the integration log and anomaly alerts.

PAIN AND ANSWER

Best execution, provable, from the venue to booked in SAP

THE MANUAL MIDDLE

Straight-through, no-touch

A trade is re-keyed between venue and SAP; a manual FX run takes 10 to 15 minutes a trade. BST carries exposure in SAP to a booked deal in TRM with zero re-keying, approvals under your rules, four-eyes on execution.

UNPROVABLE EXECUTION

Provable by design

Policy and the FX Global Code expect evidenced best execution. BST executes rule-based at the best bid, records competitive bids, matches confirmations, and logs every step on a 360° audit trail.

FRAGMENTED LANDSCAPE

Any instrument, any venue, any system

FX spot and forward, swaps, NDFs, derivatives and options, money market, investments and securities; 360T, FXall, Bloomberg FXGO, Citi Pulse, BidFX, banks, brokers and exchanges; any OMS or TMS; out of the box for SAP, no coding.

THE CENTRAL STATUS MONITOR

You see the trade mid-flight, not after it breaks

1 Request

2 Execute

3 Match

4 Book

5 Monitor

Every step in one place: request, order, merge, split, fill, match, booking and confirmation, with the integration log and anomaly alerts alongside. Exposure in SAP becomes a request, execution happens at the best bid, confirmations are matched, and the deal is booked in SAP TRM straight through. You see the trade mid-flight, not after it breaks.

THE TRADING SPACE

Your team and its Digital Co-Workers run BST together.

The trading space is where people and the Digital Co-Worker run BST side by side. The Co-Worker suggests trades, watches every run, alerts, fixes and configures; people stay in charge. The Digital Co-Worker is a feature of OnePilot, not a separate product.

BUILT IN

Built in

- + Four-eye approval and segregation of duties, as standard
- + No ABAP and no per-venue interface to maintain
- + Straight-through booking, so the manual re-key is gone

WORKS WITH

Any venue in, SAP TRM out

Executed at 360T, FXall, Bloomberg FXGO, Citi Pulse, BidFX, banks, brokers and exchanges, then booked in SAP TRM. It is instrument, venue and TMS agnostic, so a new venue is a configuration change, and the deal flows into SAP Treasury and Risk Management reconciled to source.

FXall

Bloomberg FXGO

360T

BidFX

Citi Pulse

SAP TRM

COMMON QUESTIONS

What is Brisken Smart Trading (BST)?

BST is an application on the OnePilot platform: autonomous best-bid execution across any instrument, from the venue to booked in SAP. It carries exposure in SAP to a booked deal in TRM with no re-keying, records competitive bids, and logs every action under four-eye control.

How is a trade booked without re-keying it into SAP?

The trade is executed at the venue and booked in SAP TRM straight through, validated on the way in. Because it is instrument, venue and TMS agnostic, adding a new venue is a configuration change rather than a rebuild.

Is the execution auditable for the FX Global Code?

Yes. Execution is rule-based at the best bid, competitive bids are recorded, confirmations are matched, and every step sits on a 360° audit trail, so best execution is evidenced rather than asserted.

PROOF

Listed on the SAP Store as Trade Automation. Brisken is an SAP Co-Innovation Partner, certified to ISO 27001 and SOC 1 Type II. Decided once, dealt at the best bid, booked without a touch.
