

THE TREASURY COCKPIT

TreasuryCentral

Cash, investments, debt, FX and market data in one screen, on your SAP data.

ONE PLACE TO ACT

See the position and act on it in one screen, across all six treasury domains. Governance is built in, not bolted on afterwards.

WHAT IT DELIVERS

- ◆ No separate data store to reconcile; it works on the SAP data you already trust.
- ◆ Every move logged, every action inside your controls.
