

MARKET DATA · ON YOUR SAP DATA

Market Data Hub

One point of control for market data, into SAP, no code.

THE PROBLEM

Rates, curves and prices arrive from every provider in a different shape, and most of it still lands in SAP as a hand-keyed upload.

HOW IT WORKS

PROVIDERS

Bloomberg

Refinitiv

CME Group

360T

Deutsche Boerse

OANDA

central banks

govern · transform · distribute

SAP

SAP and non-SAP ECC / S/4HANA, both ways, no code

WHAT IT DELIVERS

- ◆ Ingest rates, curves and prices from every provider through one managed feed.
- ◆ Govern entitlements and usage centrally, so the same number reaches every system that needs it.
- ◆ Retire the brittle point-to-point scripts and hand-keyed uploads for a single source of truth.

◆
no code◆
one governed feed◆
SAP + non-SAP◆
